Pathfinder Announces Release of **Patrol Officer Lifesaving Instruction Course POLIC®**

Pathfinder is pleased to announce the debut of the POLIC® program. The Patrol Officer Lifesaving Instruction Course was designed to bring the proven lifesaving techniques learned on the battlefield to the streets of the US. With the increase of everyday violence and the frequency of active shooting incidents, every officer should be trained in the most high yield lifesaving skills. The one day course covers such crucial items as rapid hemorrhage control, CPR and AED certification and medical aid during active shooter incidents. "During the Virginia Tech shooting, there were only two Tactical Medics available to treat dozens of casualties," explains Steve Carson MPAS, FP-C, Pathfinder's Medical Operations Branch Chief. "The situation would have been so much worse had it not been for the medical assistance rendered by effectively trained law enforcement officers." From Self Aid skills to use of the newest hemostatic blood clotting agents, this course covers all the critical skills an officer requires to save lives in this increasingly dangerous world. For more information see our website www.pathfinder-ops.com.
